QUALITY *you can* TRUST

FOR OVER 35 YEARS, our line of screen printing equipment has been meeting and exceeding our customers' needs. Built to last and designed for professional use, we stand behind the quality of our equipment with a 2 year warranty.

DESIGNED *for* PROFESSIONALS

Our wrenchless registration allows total control over screen adjustment without tools

Adjust the screen angle, X and Y axis and off contact independently

Pedestal style base has a small footprint in your shop

Modular design means you only replace parts as they wear, which lowers the cost of maintenance

Durable and rigid all aluminum print heads stand the test of time

DEPENDABLE SERVICE

Dedicated customer service staff available to help you with maintenance, repair, or replacement parts

We offer full restoration and repairs on older Hopkins presses

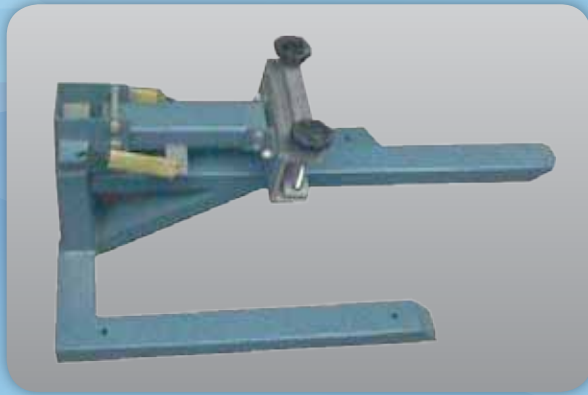

A two year warranty is standard on all new equipment purchases

MADE *in the* USA

We are proud to manufacture all our equipment in the USA.

Startingline™ Manual Press

The BWM/Hopkins Startingline™ press provides the small shop printer with a feature filled, affordably priced press. Available in a 4 color, single/dual station bench model or, pick from a full line of floor models that include a choice of 4 or 6 color model with up to 4 print stations. The Startingline™ series of presses use precision laser cutting for the base, indexer, and print head wheel. Print heads are extruded and machined from aircraft quality aluminum. Standard micros on all floor model print heads put this economically priced press in a league of it's own. Quality, Performance, & Durability... What else would you expect from BWM/Hopkins? Preferred by manual printers for more than 35 years. A two-year parts warranty is standard on all new BWM/Hopkins presses.

Built with BWM/Hopkins quality and integrity, loaded with standard features at a value price, this BWM/Hopkins press is designed to give years of service. As your screen printing needs grow, you can upgrade the 4 color model to a 6 color press or convert the large 6 color model to an 8 color press. The print head wheel and rotary base are precision laser cut out of steel. This makes it light, strong, and extremely rigid so registration is not compromised. Both print head wheel and print station wheel rotate on large 2" diameter industrial grade bearings. Print heads are 100% wrenchless! No tools necessary! A two-year parts warranty is standard on all new BWM/Hopkins presses.

Introducing the **NEW**

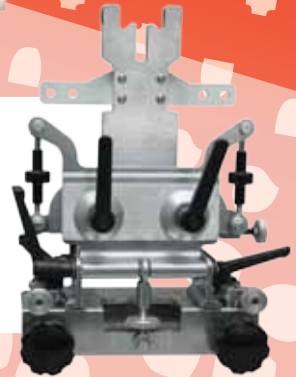

ProLine II™

Manual Press

ULTIMATE MICROS INCLUDED

All ProLineII printheads come standard with independent X and Y axis, off contact, and screen tilt micro-adjustments.

We are proud to introduce the newest member of our screen printing family, the ProLineII™. Built with the same Hopkins quality and integrity as the original ProLine™, this press is built with a precision machined solid billet aluminum print head wheel that is ultralight and sturdy. The all aluminum printheads include our Ultimate Micros™ which offer dual independent off-contact micro adjustment and screen tilt micro adjustment, in addition to the X and Y axis micro adjusters. All of which can be adjusted without tools. Both print head wheel and print station wheel rotate on large diameter industrial grade bearings.

RedAir Spot Dryer

REDAIR®

Scan to
view
product
info
online

The BWM/Hopkins REDAIR Flash Dryers are proven production dryers for surface curing most inks on printed apparel as well as other substrates. Using a combination of infrared (IR) energy and heated forced air, these units are designed to increase production output quickly, safely, and economically! It works by drawing ambient room air into the top of the IR panel through the fan. The energized IR panel super heats the air as the fan pushes it through a network of holes, out the bottom of the panel and onto the substrate. This combination of heated air and IR energy result in faster curing for increased output!

Whether you require a manual unit or an automatic, all BWM/Hopkins Redair Flash Dryers provide the printer with the features necessary to achieve the best and fastest curing results!

FEATURES & OPTIONS

- UL®, UL-C® & CE® Compliant
- Independent Adjustable REDAIR Control
- Air-Cooled Electrical Enclosure
- Circuit Breaker & Fuse Protected
- Height Adjustable IR Panel
- Full 90° Rotating Panel
- High Wattage IR Panel
- Locking Casters
- Over Platen Dwell Timer
- With Foot Pedal or Micro Switch Activation

Parts, Repairs & Refurnishing Services

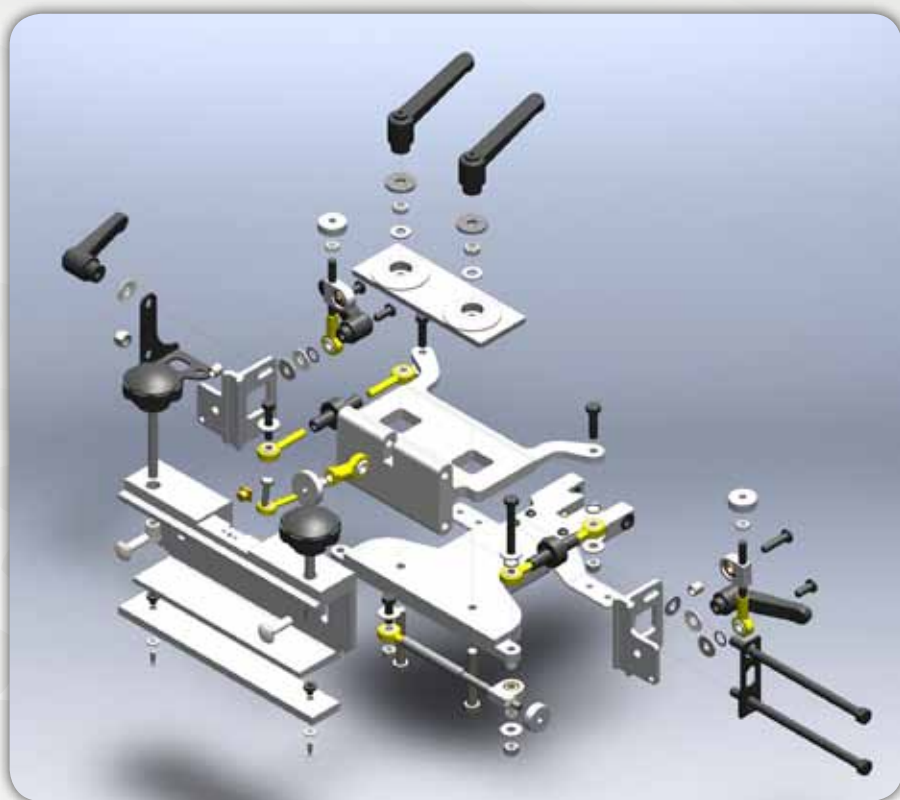

BEFORE

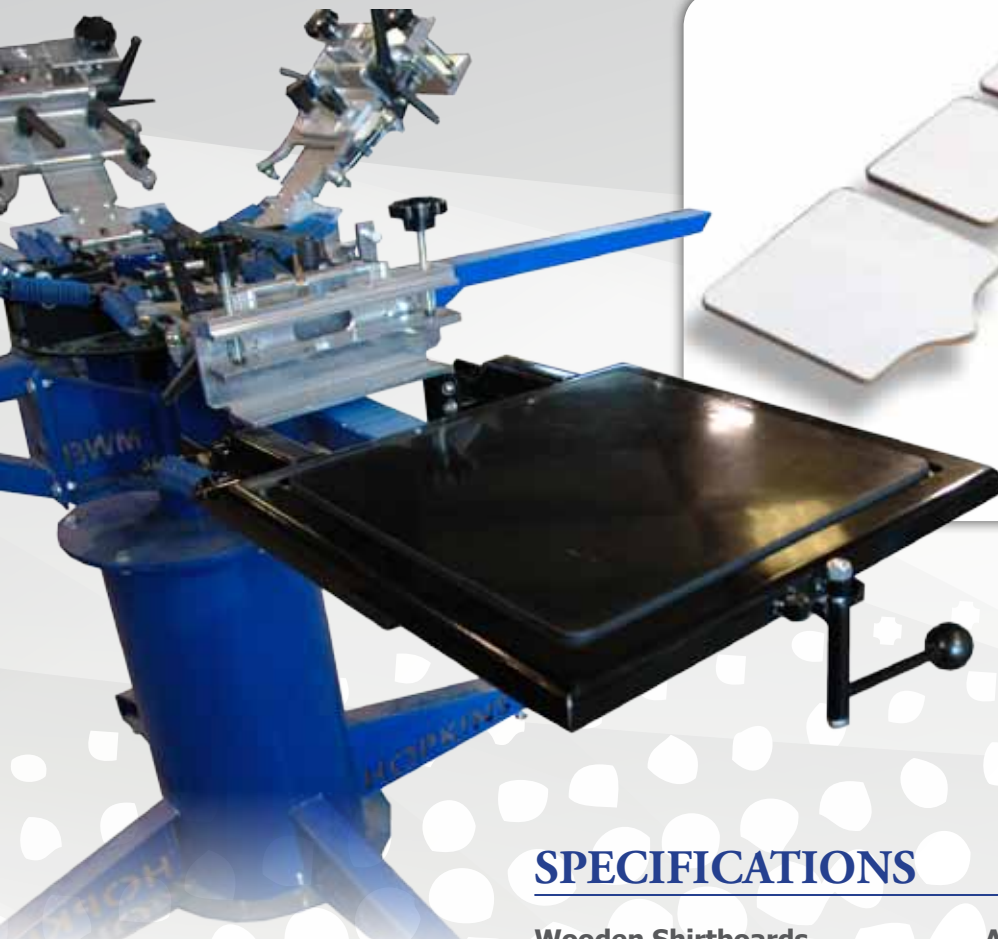

AFTER

BWM/Hopkins offers parts and repairs on all our equipment. Our customer service department is here to help you identify and order the appropriate replacement parts for your press.

We also offer refurbishing of older presses to keep them working properly.

Shirt Boards & Hold Downs

Shirtboards and shirtboard bracket assemblies are stock items. Specialty boards can be ordered, too. Plus, we stock sleeveboards, double sleeve assemblies and a wide choice of aluminum pallets. Contact your local supplier or call us for pricing and delivery.

SPECIFICATIONS

Wooden Shirtboards

Part #	Size
#33000	Bracket Assembly
#33008	8" x 10" w/bracket
#33009	10" x 10" w/bracket
